

# An Essential Layer of Protection for Laundry

*A long-lasting antimicrobial that provides a superior layer of protection for all surfaces*

## Proven results

- BioProtect has been shown to very significantly reduce the staph counts and subsequent staph infections on oil rigs.
- Use in every wash and BioProtect protection increases, as shown in a study conducted by Dr. Gideon Wolfaardt of Ryerson University. (Study is available upon request)
- BioProtect treatment increases the longevity of fabrics, as recognized by the EPA, as it "Inhibits deterioration caused by bacteria." This deterioration causes wear on fabrics as well as mold and mildew.
- Experience has shown that fabrics treated with BioProtect show less wear from laundering. Extended durability tests are now being conducted.

## Safe and effective

Keeps laundry from spreading microorganisms

Neutralizes and prevents offensive odors

Stops mold and mildew

Works on all fabrics

## How to use

- Use BioProtect LS-420 Antimicrobial Fabric Softener, a 1% active solution, in every wash.
- Add 1% of the weight of the fabric being washed using automatic feeder now used for softener.
- Antimicrobial effect builds with each wash.
- Only \$0.02 -\$.03 per pound for a softener with antimicrobial protection. Fabrics and other porous surfaces that are not regularly laundered and/or can't be laundered such as curtains, room dividers, and upholstered furniture can also be treated with BioProtect 500.
- Use BioProtect 500 - Launder or Spray
- It's 5% active ingredient will, when sprayed or washed in one-time give antimicrobial protection for the useful life of the fabric.
